

# how to open a bottle with a rope

**STEP 1** — Grab a length of rope and fold it in half.

**STEP 2** — Bring the center of the loop down to your other hand.

**STEP 3** — Put your hand through the right loop and grab the left loop.

**STEP 4** — Pull the left loop through the right one and fold it so it's closest to you. (Make sure not to twist the loop)

**STEP 5** — Reach through the left side of the original right loop

**STEP 6** — Curve your finger around and through the middle hole

**STEP 7** — Turn your finger and hook the loop on the bottom and pull through

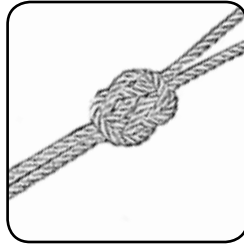

**STEP 8** — Keep pulling

**STEP 9** — Make adjustments if needed, while pulling

**STEP 10** — Get a bottle. Slip the knot over the bottleneck and under the cap.

**STEP 11** — Tighten the rope, pull up and towards yourself.
